Index to Volume 109

No. 1.

T. Elnimr, F. M. Ela-Assaly (Cairo, Egypt)
Determination of the attenuation of epicadmium neutrons using the method of varying Cd-thickness 3

M. Ashraf Chaudry, Noor-ul-Islam, Din Mohammad (Islamabad, Pakistan)
Uranium(VI) transport through tri-n-butylphosphate kerosene oil liquid membrane supported in polypropylene film 11

Y. F. Shafiq, M. A. A. Al-Janabi, M. A. M. Abdel-Azeez, M. H. S. Al-Hissoni, M. M. Jassim (Baghdad, Iraq)
Studies of the chemical and biological properties of the bone and acute myocardial imaging agent ^{99m}Tc -PYP 23

A. G. C. Nair, N. Chakravarty, A. Goswami, B. K. Srivastava, Satya Prakash (Bombay, India)
Beta-branching fraction of ^{117}Cd isomers and IT branching of ^{117m}In 37

N. R. Das, P. Chattopadhyay (Calcutta, India)
Separation of niobium and tantalum through solvent extraction and reversed phase extraction chromatography using Aliquat 336 as an anion exchanger 45

M. Attas, J. D. Chen, E. A. Hildebrandt (Pinawa, Manitoba, Canada)
An automated facility for neutron activation analysis 55

M. Ebihara, K. Tomura, M. Masutani (Gunma and Kanagawa, Japan)
Determination of trace amounts of uranium in silicate materials by means of neutron activation analysis involving rapid radiochemical separation 69

M. Czauderna, J. Konecki, M. Głowacka (Warsaw and Zabrze, Poland)
Studies on the interaction between Se, Te, Cd, As and Zn and the distribution of Fe, Co, Rb and Hg in mice by instrumental neutron activation analysis 79

V. Papassotiriou, S. Georgala, J. Stratigos, N. Panayotakis, A. Hadjiantoniou, A. A. Katsanos (Athens and Aghia Paraskevi, Greece)
Trace elements in skin epitheliomas 89

J. Suzuki, H. Yoshioka, A. Ohya, T. Kambara (Shizuoka, Japan)
Radiometric analysis based on redox substoichiometry, I. 101

J. E. Riley, Jr., R. M. Lindstrom (Murray Hill, New Jersey and Gaithersburg, MD, USA)
Determination of boron in borosilicate glasses by neutron capture prompt gamma-ray activation analysis 109

Chien Chung, Ming-Yung Woo (Hsinchu, Taiwan R. O. C.)
Fission product yields in the fast-neutron fission of ^{238}U 117

J. Szydłowski, W. Ratajska (Warsaw, Poland)
Hydrogen and chlorine isotope exchange in hydrogen dichloride ions 133

H. Meier, E. Zimmerhackl, G. Zeitler, P. Menge, W. Hecker (Bamberg, FRG)
Influence of liquid/solid ratios in radionuclide migration studies 139

R. Zaghloul, S. El-Demerdashe, M. A. Abdel-Salam, E. A. Bakhoum (Cairo, Egypt)
Nondestructive neutron activation analysis of some soil clays of Egypt 153

L. M. Antunes, A. V. Bellido (Rio de Janeiro, Brasil)
Thermal and radiation annealing in $^{131}I^-$-doped periodate crystals 169

El-H. M. Diefallah, S. N. Basahl, A. Y. Obaid, (Jeddah, Saudi Arabia)
Kinetic analysis of thermal decomposition reactions, II. 177

S. K. Aggarwal, H. C. Jain (Bombay, India)
Half-life of plutonium-241: past and present 183

S. A. Kahtani, H. P. Chou, M. A. Obeid (Riyadh, Saudi Arabia and Taiwan, R. O. C.)
Multielement NAA for the characterization of Saudi Arabian rocks 201

J. Ladrière, S. Göbölös, F. Delannay, B. Delmon (Louvain-la-Neuve, Belgium)
Mössbauer emission spectroscopy of an unsupported cobalt-molybdenum hydrodesulfurization catalyst 213

G. M. Nair, P. C. Kumar (Bombay, India)
Determination of nitrate in thorium, uranium and plutonium solutions 223

B. Carmon, A. Dyer (Salford, UK)
Čerenkov spectroscopic assay of fission isotopes, II. 229

M. Yagi, K. Masumoto (Sendai, Japan)
Instrumental photon activation analysis of environmental materials using the internal standard method 237

Bibliographic Collection

E. Bujdosó (Budapest, Hungary)
Environmental radiochemistry and radioactivity 247

No. 2.

D. C. Aumann, F. Buheitel, J. Hauschild, E. Robens, H. Wershofen (Bonn, FRG)
Chemical and nuclear interferences in neutron activation of ^{129}I and ^{127}I in environmental samples 261

L. Zikovsky, G. Kennedy, P. LaSalle (Montreal and Quebec, Canada)
The lognormal distribution of trace elements in glacial till 275

R. Zaghloul, E. Gantner, M. Mostafa, H. J. Ache (Karlsruhe, FRG)
Neutron activation analysis without multielement standards 283

R. Zaghloul, E. Gantner, M. Mostafa, H. J. Ache (Karlsruhe, FRG)
Epithermal neutron activation analysis using the monostandard method 295

R. Zaghloul, E. Gantner, M. Mostafa, H. J. Ache (Karlsruhe, FRG)
Prompt gamma-ray neutron activation analysis facility testing by Sm, Gd and Mn determination in rock samples 309

K. Sahul, B. K. Sharma (Tiruchirapalli and Delhi, India)
Gamma radiolysis of nitrilotriacetic acid (NTA) in aqueous solutions 321

J. N. Mathur, P. K. Khopkar (Bombay, India)
Liquid-liquid extraction of trivalent actinides and lanthanides with mixtures of N-benzoyl-N-phenyl hydroxylamine and neutral donors 329

J. Klas, Z. Koreňová, J. Tölgyessy (Bratislava, Czechoslovakia)
The sub- and super-equivalence method of isotope dilution, XIII. 337

S. Usuda, N. Shinohara, H. Yoshikawa (Tokyo, Japan)
Single column ion exchange separation of the transplutonium elements from uranium targets bombarded with heavy ions and catcher foils 353

D. L. Samudralwar, H. K. Wankhade, A. N. Garg (Nagpur, India)
Determination of Fe and Zn in biological samples by radiochemical neutron activation analysis 363

M. Wasek, S. Sterliński (Warszawa, Poland)
Blank evaluation in nitrogen determination in seed grains by 14 MeV neutron activation analysis 373

L. Fukal, J. Prošek, P. Rauch, Z. Sova, J. Kdš (Prague and Tupadly, Czechoslovakia)
Selection of the separation step in the radioimmunoassay for aflatoxin B_1 using ^{125}I as a marker 383

M. Benjelloun, J. M. Paulus (Strasbourg, France)
α-Determination in the $E^{-(1+\alpha)}$ epithermal neutron spectrum of the CRN reactor (Strasbourg) 393

S. A. Pai, M. S. Subramanian (Bombay, India)
Synergistic extraction of uranyl ion with 1-phenyl-3-methyl-4-benzoyl-pyrazolone-5 (HPMBP) and some long chain aliphatic sulfoxides 403

N. R. Das (Calcutta, India)
Ion exchange separation of ^{90}Y from ^{90}Sr using ascorbic acid and nitrilotriacetic acid as eluents 413

T. Hofmann, P. Hoffmann, K. H. Lieser (Darmstadt, FRG)
On-line determination of actinides by energy-dispersive XRF induced by γ-emitting radionuclides 419

M. Devillers, J. Ladrière, D. Apers (Louvain-la-Neuve, Belgium)
Study of the incorporation of carrier-free ^{57}Co in Fe(II) and Mn(II) oxalates by a double radioactive tracer method 439

K. Masumoto, M. Yagi (Sendai, Japan)
Simultaneous determination of P, Cl, K and Ca in several control serums by alpha-particle activation analysis using the internal standard method 449

P. Hsiung, P. Trocellier (Gif-sur-Yvette, France)
Characterization of the superficial region of solids using the Rutherford backscattering method with charged particles, I. 459

P. Hsiung, P. Trocellier (Gif-sur-Yvette, France)
Characterization of the superficial region of solids using the Rutherford backscattering method with charged particles, II. 479

S. Musić, M. Ristić (Zagreb, Yugoslavia)
Adsorption of microamounts of ruthenium on hydrous iron oxides 495

Bibliographic Collection

E. Bujdosó (Budapest, Hungary)
